

Why bet on one horse/one method when you can bet on all methods and let the best one win? At the start, the Fast, In-Phase and Residual Transfer methods are all in the race. With Beckwith Electric's Motor Bus Transfer Systems, all methods are running in parallel. Let the best horse/method win by using the most accurate motor bus transfer system available – the M-4272 Motor Bus Transfer System by Beckwith Electric.

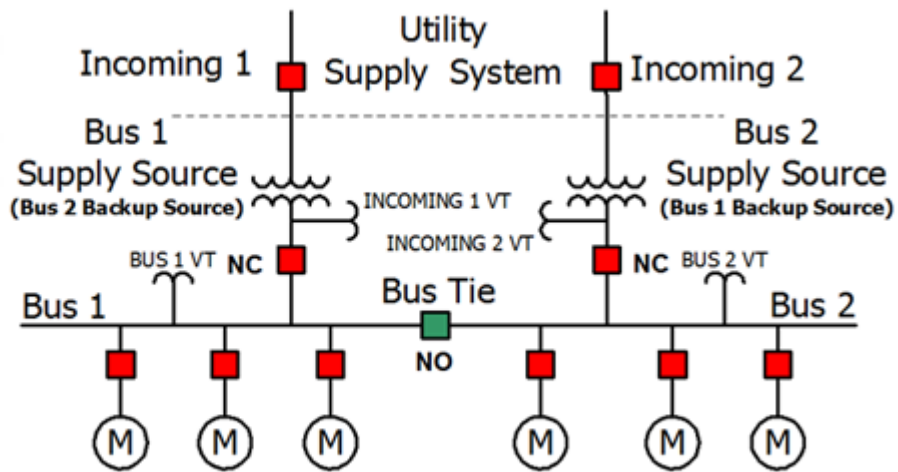

Maintain your process and preserve your motor assets.

With the ability to react within a quarter cycle to properly cope with dynamics of motor bus transfer, the M-4272 will make the proper decision for flawless transfer.

Main-Backup Application

Main-Tie-Main Application

Tip: Don't bet on the residual transfer.
The Fast and In-Phase Transfers are the
Daily Double!
